

CASCADING GATEFOLD CARD

1. Cut out the template, score along the dotted lines and cut along the solid lines. If you are using the SVG version these will have been done for you. On the template version you will need to cut all the way to the edge of the card on the long diagonal line to create two pieces.

2. Valley fold along the green dotted lines and mountain fold along the red dotted lines.
3. Slot the two template pieces together using the cut lines in each section. This should create a concertina fold that will fold flat.
