CRAFTY TEMPLATES - CRAFT A CAKE

1. Choose your cake shape and chosen printed paper or cardstock.
2. Draw round the outer shape for the cake base.
3. Cut out using scissors. Do this for each tier of cake you desire. For smaller tiers, draw within the grooves of the stencils and cut out with scissors. If you want to make the base a standing card, cut two and score and fold a tab on one of the shapes and attach to the back of the other to create a tent card.
4. For the decorations, draw around the edges of the decorations you want to decorate your cake with on your chosen cardstock or printed paper. Draw in any detail lines while the stencil is in place.
5. Cut out the decorations with scissors.
6. The drips of the icing line on the Sweet Stencil has been designed to fit within each size of the Iced Cake Stencil. Draw around the size cake tier you desired and stop at the bottom of the drip.
7. Place the stencil onto the Iced Cake tier and line up with the outside drips and draw the detail line.
8. This give you a full icing template.
9. Cut out with scissors and mat onto your cake tiers along the rest of your decorations.
