CARD MAKER'S CLUB

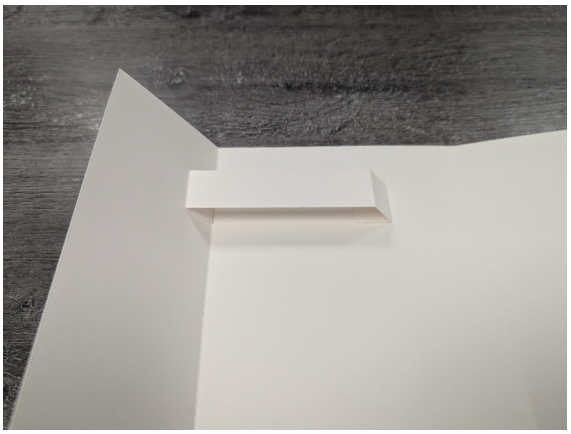

FLOATING GATEFOLD CARD INSTRUCTIONS

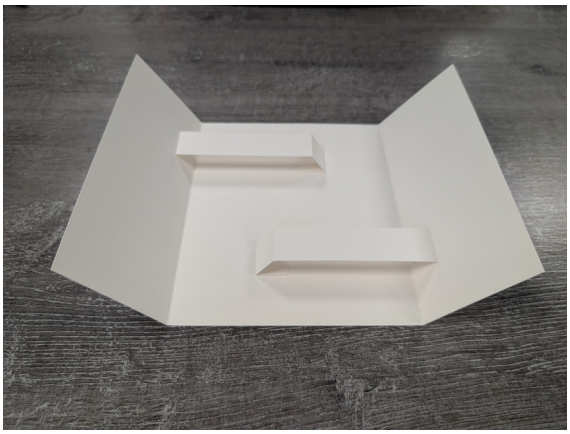

1. Cut out all template pieces and score and fold where instructed. Valley fold on the Card Base to create a gatefold card.

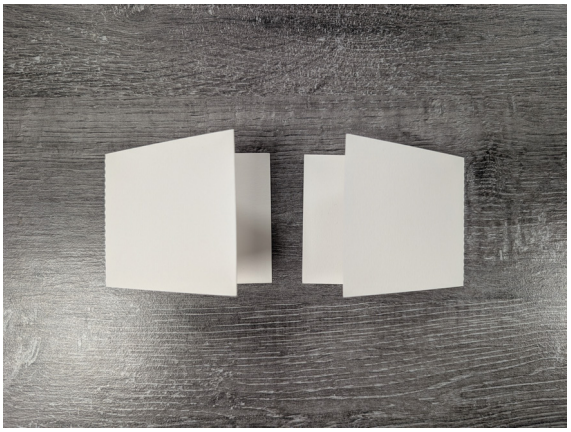

2. Mountain fold the score lines on the Mechanism piece. Attach the single tab end to the inside of the left gatefold, so it lines up with the fold and is about 3cm from the top edge.

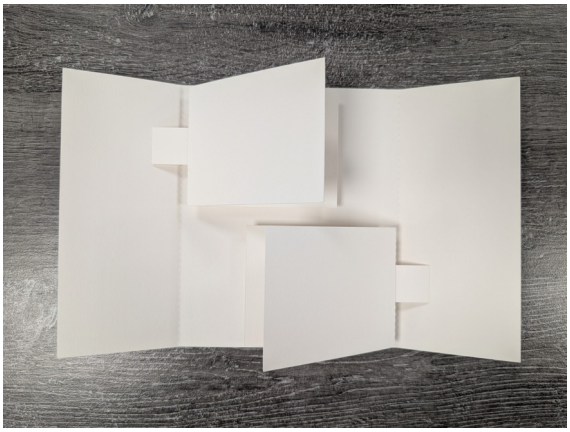

3. Fold the Mechanism over and stick the other tab to the middle section of the card so the Mechanism folds flat.

4. Repeat with the other Mechanism piece but on the right gatefold.

5. Fold the Floating Cards in half. You will need one card opening left to right, and one card opening right to left.

6. Mat the Floating Cards onto the middle of the mechanisms so that they sit just inside the middle section of the gatefold card.
