CRAFT MASTER

Slide & Reveal Card SVG Instructions

BY VIKKI DEAKIN

Cutting List :

1 x Card Base Back

1 x Card Base Front

3 x Mechanism

4 x Slider Sleeve

1 x Slider Tab

All mats & layers

1. **Fold up the Slider Sleeves so that the tab is on the outside of the sleeve. Do this for all four sleeves.**
2. **Glue the two small Mechanism pieces to the tabs of the large piece so you have three long Mechanism pieces.**
3. **Slide one Mechanism through a Slider Sleeve making sure the glued tab of the sleeve is at the back and the bottom and push the Mechanism to the top of the sleeve. Glue the Mechanism closed making sure it can slide up and down. TOP TIP: Rub wax on the top and bottom of each sleeve to help the mechanism glide.**
4. **Repeat step 3 with another two Slider Sleeves and Mechanisms. The fourth sleeve doesn't need a Mechanism. Decorate your sleeves before you continue with construction.**
5. **Glue the tabbed edge of one Slider Sleeve to the Mechanism of another. Only add glue to the Mechanism. Glue the next Slider Sleeve to the Mechanism of the previous one.**
6. **Glue the last Slider Sleeve to the last Mechanism.**
7. **Glue the Slider Tab to the underneath of the top Slider Sleeve.**
8. **Glue the tab of the Card Front to the Card Back to make the card base. Glue the back of the first Slider Sleeve to card front.**
