

These instructions are to show you the basic construction of the card. Please add mats and layers as you build the card.

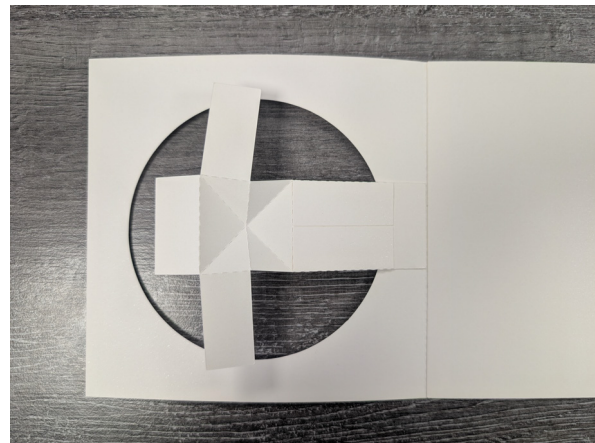

1. Cut out all pieces from your chosen cardstock. Glue the Card Front to the Card Back using the tab.

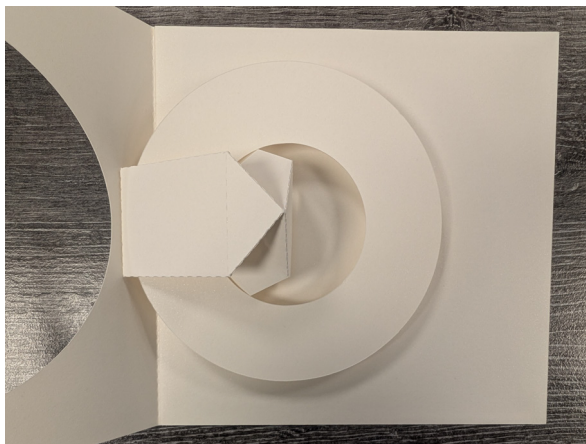

2. Score and fold the lines on the Mechanism piece.

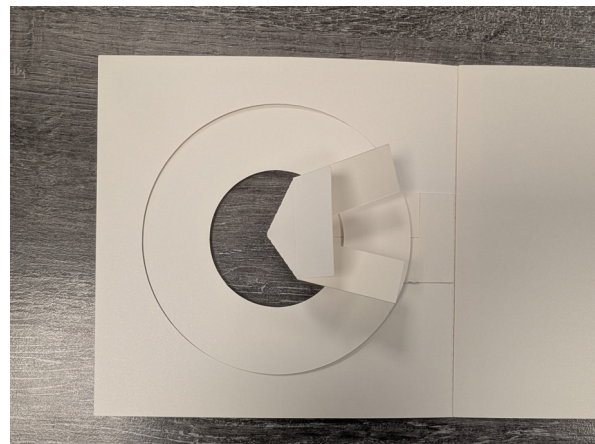

3. Fold down the large tabs and stick to the large rectangle section of the Mechanism piece.

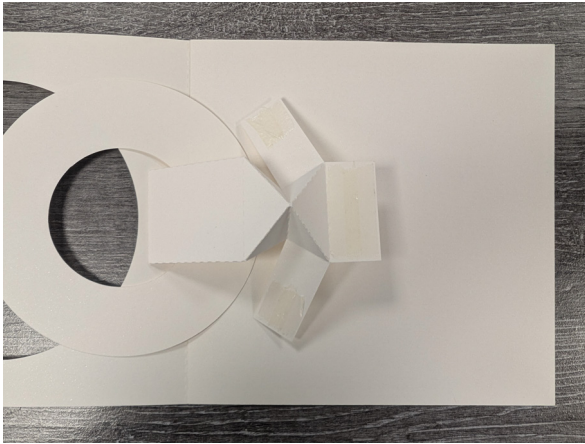

4. Attach the Mechanism to the inside of the Card Front so the folded in tab side is on the inside of the card.

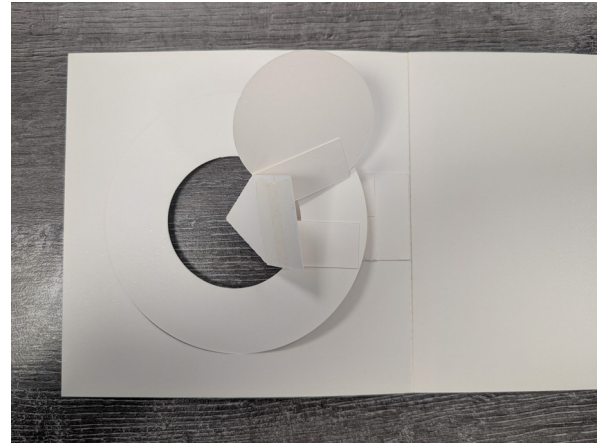

5. Feed the arms of the Mechanism piece through the Inner Circle 02 piece, which is the circle with the aperture.

6. Open up the card so you can see the back of the Mechanism.

7. Pull the Mechanism over to the other side of the card and attach glue to the tab and to the ends of each wing tab.

8. Fold the Mechanism back onto the front of the card. While keeping the circle frame centred in the middle of the card, attach to the bottom wing to the frame and add the Inner Circle 03 to the other wing.

9. Fold the card front over to the card back to stick the Mechanism to the back of the card.

10. Stick Inner Circle 01 to the front of the Mechanism in the centre of the card.
