

DREAMCATCHER INSTRUCTIONS

1. Wind thread onto the metal craft loop.
2. Tie a knot around the hoop.
3. Loop string at equal points around the ring.
4. Keep looping all the way round to form the start of a web.
5. Pull the thread tight to produce a tighter net.
6. Keep tying loops around the sections of the web you have created.
7. Once you reach the middle, put a bead in the middle of your web.
8. Tie a knot to secure the bead and cut off any excess thread.
9. Wrap 11 rings of thread around your three middle fingers.
10. Tie the strings together using a piece of thread, leaving a big loop.
11. Wrap thread around the top of the tassel, about 2cm from the knot. Cut open all bottom loops to create a tassel.
12. Add beads to the large top loop on the tassel. Repeat steps 9-12 four times to create more tassels.
13. Loop the 5 tassels onto the bottom edge of your dreamcatcher, spacing them equally.
14. Add beads to the top of the tassel loops if desired.
15. Tie a length of string to the top of your dreamcatcher for hanging and then you are finished.
