From the Makers of
Cutting Craftorium

Mantlepiece Miniatures

INSTRUCTION BOOKLET

Hello my lovely crafty friends,

I am delighted to introduce to you the latest USB from Digital Craftorium.

Mantlepiece Miniatures contains 15 3D, scalable projects that are easy to build from construction board. Plus an embellishment toolbox full of surprises!

Enjoy & Happy Crafting

Mel xxx

Top Tip! Paint or add decorative papers to each piece before gluing the project together.

Top Tip! Use your Scan 'N' Cut's resize option to scale your projects to be as big or as little as you need.

Contents...

Town House	4-5
Country Cottage	6-7
Flower Shop	8-9
Toy Shop	10-11
Wishing Well	12-13
Town Clock	14-15
Village Train	16-19
Conservatory	20-21
Through The Window	22-23
Wagon	24-25
Windmill	26-29
Mantle Clock	30-31
Greenhouse	32-33
Garden	34-35
Dresser	36-37
Embellishment Toolbox	38-40
Parasol Instructions	41
Inspiration	42

Town House

Cutting List:

All construction projects on this USB have been made using 1000 micron construction board. If you are using 750 micron construction board, you will need to cut 4 of each layer. We recommend using Pinflair Bookbinding Glue.

From construction board:

- 1 x Base
- 1 x Back
- 1 x Sides
- 1 x Front
- 1 x Roof
- 1 x Door
- 1 x Door Handle
- 1 x Inner Door Frame
- 1 x Outer Door Frame
- 1 x Inner Window Frame
- 1 x Outer Door Frame

From cardstock:

- 1 x Doorway Bricks
- 1 x Lower Bricks
- Roof Tiles – As many as required.
- 1 x Roof Tile Topper

From acetate:

- 1 x Window Glass
- 1 x Door Glass

1. Stick all of the layers of construction board together to make all of the pieces listed in the Cutting List.
2. Once dry, paint all of the pieces as desired. Or alternatively cover all pieces using decorative papers.
3. Edge all pieces using a thick marker pen to hide the raw construction board edges.
4. Glue the Back to the bottom edge of the Base, making sure it sits on top of the Base piece.
5. Taking the Side pieces, glue the Sides to the Back and Base pieces.
6. Glue the Front Piece to the Sides and Base, ensuring that the Front sits on top of the Base.
7. Glue the Inner Door Frame to the inside of the Front, ensuring that the Frame is aligned to the doorway.
8. Take the Door Glass and glue in place on the inside of the Door piece. Glue the Door Handle to the outside of the Door.
9. Glue the main Door inside of the house aligning the door to the doorway and making sure that the Door sits on top of the Base.
10. Glue the rounded part of the door to the inside of the door ensuring to align it to the remaining space in the doorway.
11. Glue the Window Glass to the Inner Window Frame, then glue to the inside of the house, lining up to the window.
12. Glue the Doorway Bricks to the outside of the house around the doorway and the Lower Bricks to the house below the Window.
13. Glue the Outer Door Frame and Outer Window Frame to the outside of the house ensuring to match to the doorway and window.
14. Glue the Roof piece in place, ensuring that the Roof Piece overhangs the front of the house.
15. Glue all Roof Tiles to the Roof piece.
16. Take the Roof Tile Topper and fold along the dashed line. Glue the Roof Tile Topper to the very top of the Roof, making sure that the back of the folded piece is glued to the back of the Town House.

Country Cottage

Cutting List:

All construction projects on this USB have been made using 1000 micron construction board. If you are using 750 micron construction board, you will need to cut 4 of each layer. We recommend using Pinflair Bookbinding Glue.

From construction board:

- 1 x Base
- 1 x Back
- 2 x Side
- 1 x Front
- 1 x Roof
- 1 x Door
- 1 x Outer Door Frame
- 1 x Chimney
- 2 x Inner Window Frames
- 2 x Outer Window Frames
- 1 x Porch Roof
- 1 x Porch Front
- 4 x Post

- 1 x Porch Roof Facing
- 1 x Roof Facing

From cardstock:

- Roof Tiles – As many as required.
- 1 x Roof Tile Topper

From acetate:

- 2 x Window Glass
- 1 x Door Window Glass

1. Stick all of the layers of construction board together to make all of the pieces listed in the Cutting List.
2. Once dry, paint all of the pieces as desired. Or alternatively cover all pieces using decorative papers.
3. Edge all pieces using a thick marker pen to hide the raw construction board edges.
4. Glue the Back to the back edge of the Base, making sure it sits on top of the Base piece.
5. Taking the Side pieces, glue the Sides to the Back and Base pieces.
6. Glue the Front Piece to the Sides and Base, ensuring that the Front sits on top of the Base.
7. Take the Door Window Glass and glue in place on the inside of the Door.
8. Glue the main Door inside of the house, aligning the door to the doorway and making sure that the Door sits on top of the Base.
9. Glue the Inner Window Frames and the Window Glass Together.

We have included both open and closed window options for this project.
10. Glue the Inner Window Frames to the inside of the house, aligning to the windows.
11. Using one of the Post pieces as a guide, glue the Porch Roof to the Front piece, making sure that the post can be glued to the Roof and Base later.
12. Glue two Post pieces together, repeat for the other two Post pieces.
13. Glue the Porch Front to the front edge of the Porch Roof ensuring that it sits on top of the Porch Roof.
14. To attach the Roof, overlap the longer of the two Roof pieces on top of the other piece, then glue to the main house and Porch Front.
15. Glue the two Posts in place at either side of the Porch.
16. Glue all Roof Tiles to the Roof.
17. Take the Roof Tile Topper and fold along the dashed line. Glue onto the roof covering the join at the centre of the Roof.
18. Glue the Outer Door Frame and Outer Window Frames to the outside of the house, ensuring to line up with the windows and doorway.
19. Glue the Chimney together and glue to the Roof.
20. Glue the Porch Roof Facing to the bottom edge of the porch.
21. Glue the Roof Facing to the Front of the roof, ensuring to join the two pieces at the centre point of the roof.

Flower Shop

Cutting List:

All construction projects on this USB have been made using 1000 micron construction board. If you are using 750 micron construction board, you will need to cut 4 of each layer. We recommend using Pinflair Bookbinding Glue.

From construction board:

- 1 x Base
- 1 x Back
- 1 x Bay Window
- 4 x Canopy Frame
- 1 x Door Step
- 1 x Door
- 1 x Front
- 1 x Outer Door Frame
- 2 x Shop Base & Top
- 1 x Shop Sign
- 1 x Shop Sign Frame
- 2 x Side

From cardstock:

- 1 x Canopy

From acetate:

- 1 x Bay Window Glass
- 1 x Door Glass

Draw Files:

- Shop Sign Draw File 1 (Optional)
- Shop Sign Draw File 2 (Optional)
- Shop Sign Draw File 3 (Optional)

1. Stick all of the layers of construction board together to make all of the pieces listed in the Cutting List.
2. Once dry, paint all of the pieces as desired. Or alternatively cover all pieces using decorative papers.
3. Edge all pieces using a thick marker pen to hide the raw construction board edges.
4. Glue the Back to the back edge of the Shop Base piece, ensuring that the Back sits on top of the Shop Base.
5. Take the Side pieces and glue them to each side of the Back, making sure that they sit on top of the Base and Back.
6. Glue the Front to the Sides and Base, ensuring that it sits on top of the Base.
7. Glue the Door Glass to the back of the Door.
8. Glue the Door to the inside of the Front of the Flower Shop, ensuring that the Door is aligned to the centre of the doorway.
9. Glue the Shop Top to the top edges of the Flower Shop.
10. Glue the Door Step Piece to the Bottom of the Flower Shop, making sure that the straight edges all line up and the step is aligned to the doorway.
11. Glue the Base to the bottom of the Door Step piece.
12. Glue the Bay Window Glass to the Back of each Bay Window piece.
13. Glue the side pieces of the Bay Window to the front piece of Bay Window.
14. Once dry, glue the window section to the bottom piece of the Bay Window, ensuring to line up the back edge of the sides to the back edge of the Base. Glue the top to the top edges of the Bay Window.
15. Glue the Bay Window to the Front of the Flower Shop, making sure that it lines up with the window opening.
16. Glue the Outer Door Frame in place, ensuring that it sits around the doorway and sits on the Door Step.
17. To create the Shop Sign, use one of the Shop Sign Draw Files to draw on the Shop Sign piece.
18. Glue the Shop Sign Frame on top of the Shop Sign, lining up the edges.
19. Glue the Shop Sign to the top edge of the Flower Shop.
20. In the space between the Shop Sign and the top of the Bay Window, glue one of the Canopy Frames to the side edge of the Front. Repeat for the other side.
21. Glue the remaining two Canopy Frame pieces to the Front pieces, ensuring that all the Canopy Frame pieces are stuck at the same height and evenly spaced across the Front.
22. Fold along the dashed line on the Canopy and attach the Canopy to the Canopy frame, by making sure that the top edge is against the Front of the Flower Shop. Attach the two sides to the Outer Sides of the Canopy Frame.

Toy Shop

Cutting List:

All construction projects on this USB have been made using 1000 micron construction board. If you are using 750 micron construction board, you will need to cut 4 of each layer. We recommend using Pinflair Bookbinding Glue.

From construction board:

- 1 x Base
- 2 x Shop Base & Top
- 1 x Back
- 1 x Front
- 2 x Side
- 1 x Bay Window
- 1 x Door
- 1 x Outer Door Frame
- 1 x Shop Sign

From acetate:

- 1 x Bay Window
- 1 x Door Glass

From cardstock:

- 1 x Canopy
- 1 x Canopy Decoration
- 1 x Bay Panelling
- 1 x Flag Stones

Draw Files:

- Shop Sign Draw File 1 (Optional)
- Shop Sign Draw File 2 (Optional)
- Shop Sign Draw File 3 (Optional)
- Shop Sign Draw File 4 (Optional)

1. Stick all of the layers of construction board together to make all of the pieces listed in the Cutting List.
2. Once dry, paint all of the pieces as desired. Or alternatively, cover all pieces using decorative papers.
3. Edge all pieces using a thick marker pen to hide the raw construction board edges.
4. Glue the Back to the back edge of the Shop Base piece, ensuring that the Back sits on top of the Shop Base.
5. Take the Side pieces and glue them to each side of the Back, making sure that they sit on top of the Base and Back.
6. Glue the Front to the Sides and Base, ensuring that it sits on top of the Base.
7. Glue the Door Glass to the back of the Door, then glue the two single doors to the large double door piece.
8. Glue the Door to the inside of the Front of the Toy Shop, ensuring that the Door is aligned to the centre of the doorway.
9. Glue the Bay Window Glass to the Back of each Bay Window piece.
10. Glue the side pieces of the Bay Window to the front piece of the Bay Window.
14. Once dry, glue the window section to the Shop Base and the Front piece.
15. Glue the Shop Top to the top edges of the Toy Shop.
16. Glue the Outer Door Frame pieces together, making sure the edges line up, then attach to the Front of the Toy Shop aligning to the doorway.
17. To create the Shop Sign, use one of the Shop Sign Draw Files to draw on the Shop Sign piece.
18. Glue the Shop Sign Frame on top of the Shop Sign, lining up the edges.
19. Glue the Shop Sign to the Toy Shop above the Door.
20. Glue the Base to the bottom of the Toy Shop, lining the back edge up.
21. Take the Canopy pieces and fold along the dashed lines. Glue the diagonal edge of the side pieces to the tabs on the long front piece.
22. Glue the Canopy Decoration in place on the Canopy, ensuring that each line is aligned to the edges of the pieces.
23. Use the remaining tabs to attach the canopy to the top edge of the Toy Shop around the Bay Window.
24. Decorate the Bay Window with the the Bay Panelling underneath the Windows.
25. Create a pathway by gluing the flag stones in front of the Door on the Base piece.

Wishing Well

Cutting List:

All construction projects on this USB have been made using 1000 micron construction board. If you are using 750 micron construction board, you will need to cut 4 of each layer. We recommend using Pinflair Bookbinding Glue.

From construction board:

- 1 x Base
- 2 x Front & Back
- 2 x Side Layer 1
- 2 x Side Layer 2
- 2 x Side Layer 3
- 2 x Side Layer 4 Roof
- 1 x Roof

- 1 x Central Beam
- 2 x Wall Top Front & Back
- 2 x Wall Top Side
- 1 x Outer Beam Decoration
- 1 x Bucket

From cardstock:

- Roof Tiles – As many as required.
- 1 x Roof Tile Topper

1. Stick all of the layers of construction board together to make all of the pieces listed in the Cutting List.
2. Once dry, paint all of the pieces as desired. Or alternatively cover all pieces using decorative papers.
3. Edge all pieces using a thick marker pen to hide the raw construction board edges.
4. Glue the Front to the back edge of the Base, ensuring that it sits on top of the Base piece.
5. Glue Side Layer 2 to the back of Side Layer 1, ensure that the bottom edges are lined up. Glue Side Layer 3 to the Back of Side Layer 2.
6. Repeat with the other Side Pieces.
7. Glue the sides to the Base and Front piece, making sure that the Side Layer 1 piece is lined up to the edge of the Base and that the taller pieces of the Wishing Well are on the inside of the walls.
8. Glue the Side Layer 4 to the top edges on the inside of the Side pieces, making sure that the top edges are all aligned.
9. Glue the Central Beam to the inside of the Wishing Well.
10. Take the Outer Beam Decorations and glue one on the outside of each side piece, ensuring to line with level of the Central Beam.
11. To attach the Roof, overlap the longer of the two Roof pieces on top of the other piece. Then glue to the Wishing Well.
12. Glue all Roof Tiles to the Roof.
13. Take the Roof Tile Topper, and fold along the dashed line. Then glue this onto the Roof, covering the join at the centre of the Roof.
14. Glue the Wall Top Front to the top edge of the Wishing Well wall.
15. Glue the Wall Top Side to the top edge of the Wishing Well wall, making sure that the edge matches to the Wall Top Front Piece. Repeat for the other side.
16. Glue the Wall Top Back to the top edge of the Wishing Well wall ensuring to match up the Wall Top Side pieces.
17. Glue together the Bucket, ensuring that the handle is glued to the centre of the Bucket.
18. To finish, tie a length of string or ribbon to the handle of the Bucket. Carefully place the Bucket into the bottom of the Wishing Well and tie the string or ribbon to the Central Beam so the Bucket hangs inside the Wishing Well.

Town Clock

Cutting List:

All construction projects on this USB have been made using 1000 micron construction board. If you are using 750 micron construction board, you will need to cut 4 of each layer. We recommend using Pinflair Bookbinding Glue.

From construction board:

- 1 x Base
- 2 x Front & Back
- 2 x Side 1
- 2 x Side 2
- 2 x Side 3
- 2 x Side 4
- 1 x Side 5
- 1 x Side 6
- 2 x Side 7

- 2 x Side 8
- 2 x Front Mats
- 2 x Front Frames
- 2 x Clock Face
- 2 x Side Mats
- 2 x Side Frames

Draw Files:

- Clock Face 1 (Optional)
- Clock Face 2 (Optional)

1. Stick all of the layers of construction board together to make all of the pieces listed in the Cutting List.
2. Once dry, paint all of the pieces as desired. Or alternatively cover all pieces using decorative papers.
3. Edge all pieces using a thick marker pen to hide the raw construction board edges.
4. Starting with the Base, glue the Back to the back edge of the Base, making sure that the Back piece sits on top of the Base.
5. Glue Side 1 to the Base and back, making sure that the side sits on top of the Base Piece.
6. Repeat on the other side of the Base.
7. Glue Side 2 to the top edge of Side 1 and the Back piece.
8. Using the visual guide to add each Side piece to the Back of the Town Clock. Add each piece in order of their number and make sure that each piece lines up to the edges of the Back.
9. Glue the Front to the Sides and Base, making sure that the Front sits on top of the Base.
10. Glue the Front Mats to the front of the Town Clock matching all the edges to the corresponding pieces.
11. Glue the Front Frames to the front of the Town Clock on top of the Mat pieces.
12. To create the Clock Face, use one of the Clock Face Draw Files to draw on the Clock Face piece.
13. Glue each Clock Face to the centre of the top section of the Town Clock.
14. Glue all Side Mats and Side Frames to the corresponding panels on the side.

Village Train

Cutting List:

All construction projects on this USB have been made using 1000 micron construction board. If you are using 750 micron construction board, you will need to cut 4 of each layer. We recommend using Pinflair Bookbinding Glue.

From construction board:

- 1 x Base
- 2 x Cab Sides
- 1 x Cab Back
- 1 x Cab Front
- 1 x Cab Top
- 2 x Engine 1 Base and Top
- 2 x Engine 1 Front and Back
- 2 x Engine 1 Side
- 2 x Engine 2 Base and Top
- 2 x Engine 2 Front and Back
- 2 x Engine 2 Side
- 1 x Chimney
- 1 x Train Front Plate
- 2 x Bumper
- 2 x Set of Train Wheels
- 1 x Skirt Front
- 1 x Skirt Back
- 2 x Skirt Side
- 1 x Chain
- 1 x Carriage Base
- 2 x Carriage Sides
- 2 x Carriage Front and Back
- 1 x Carriage Skirt Front
- 1 x Carriage Skirt Back
- 2 x Carriage Skirt Side
- 2 x Set of Carriage Wheels
- 1 x Track

1. Stick all of the layers of construction board together to make all of the pieces listed in the Cutting List.
2. Once dry, paint all of the pieces as desired. Or alternatively cover all pieces using decorative papers.
3. Edge all pieces using a thick marker pen to hide the raw construction board edges.
4. Starting with the Base, glue the Cab Back to the back edge of the Base, making sure that the Cab Back piece sits on top of the Base.
5. Glue the Cab Sides to the Cab Back and Base pieces, making sure they sit on top of the Base piece.
6. Glue the Cab Front to the Base and Cab Side pieces.
7. Glue the Cab Top to the top edges of the Cab.
8. Glue the Engine 1 Back to the back edge of Engine 1 Base, making sure that the Engine 1 Back piece sits on top of the Engine 1 Base.
9. Glue the Engine 1 Side pieces to the edge of the Back and Base pieces, ensuring that the sides sit on top of the Base.
10. Glue the Engine 1 Front to the Engine 1 Sides and Base, making sure that the Front sits on top of the Base.
11. Repeat steps 8 to 10 for Engine 2.
12. Glue Engine 2 to the top of Engine 1, making sure that the front and back are aligned and it sits in the middle of Engine 1.
13. Glue the Engine to the centre of the Base ensuring the back of the Engine section sits against the Cab.
14. Taking the Train Front Plate, glue each piece to each other to create a stack.
15. Glue the Train Front Plate to the front of the Engine Section.
16. Glue the two small pieces of one of the Bumpers together. Glue the larger piece to the stack of small pieces. Repeat for the remaining Bumper.
17. Glue together the two sections of Chimney. Glue together the two pieces of Chimney, making sure that the piece with a hole in it is to the very top of the Chimney.
18. Glue the Chimney to the top of the Engine section.
19. Glue together the corresponding layers of the Train Wheels to create 2 large wheels, 2 medium and 2 small.
20. Glue the Skirt Front to the front edge of the Base.
21. Glue the two Skirt sides to the outer edge of the Base and Edge of the Skirt Front, making sure that it sits on the outside of the Base.
22. Glue the Skirt back to the back outer edge of the Base.
23. Glue the Train Wheels to the sides of the Train Skirt, making sure that the wheels are all level to the floor.
24. To make the Carriage, glue the Carriage Back to the back side of the Carriage Base, making sure that the back sits on top of the base.

25. Glue the Carriage sides to the Carriage Base, making sure that they sit on top of the Base.
26. Glue the Carriage Front to the Sides and Base of the Carriage.
27. Glue the Carriage Skirt Front to the front edge of the Carriage Base, making sure that the top edge of the Carriage Skirt is aligned to the Carriage Base.
28. Glue together the Carriage Wheels to make 4 wheels.
29. Glue the Carriage Wheels to the sides of the Carriage Skirt, making sure that the wheels are all level to the floor.
30. To attach the Carriage to the Train, take the Chain and loop the complete loop over one of the halves. Glue the two edges of the half to the centre of the Carriage Skirt Front.
31. Loop the remaining half of the Chain through the complete loop. Glue the two edges of the half to the centre of the Train Skirt Back.
32. Glue the Train Track together by gluing one of the long thin pieces to the back edge of the Track, ensuring that the thin piece sits on top of the Track. Repeat for the other edge.
33. Glue another long thin piece to the inner edge of the track. Repeat for the other side.

Conservatory

Cutting List:

All construction projects on this USB have been made using 1000 micron construction board. If you are using 750 micron construction board, you will need to cut 4 of each layer. We recommend using Pinflair Bookbinding Glue.

From construction board:

- 1 x Base
- 1 x Back
- 1 x Front
- 2 x Side
- 1 x Roof
- 1 x Door
- 1 x Outer Door Frame

From acetate:

- 1 x Door Glass
- 1 x Back Glass
- 1 x Front Glass
- 2 x Side Glass

From cardstock:

- Roof Tiles – As many as required.
- 2 x Roof Tile Topper

An alternate version is included and can be found here on the USB:

8 Conservatory>Conservatory Cardstock Project.

From cardstock:

- 1 x Base & Sides
- 1 x Back
- 1 x Front
- 1 x Roof

From acetate:

- 1 x Back Glass
- 1 x Front Glass
- 2 x Side Glass

1. Stick all of the layers of construction board together to make all of the pieces listed in the Cutting List.
2. Once dry, paint all of the pieces as desired. Or alternatively cover all pieces using decorative papers.
3. Edge all pieces using a thick marker pen to hide the raw construction board edges.
4. Glue the Glass pieces to the back of all of the corresponding pieces.
5. Glue the Back piece in place to the back edge of the Base, making sure that it sits on top of the Base and that the glass is on the inside.
6. Glue the Side pieces in place, gluing them to the edge of the Base and the Back piece.
7. Glue the Door to the inside of the Front piece, making sure to line up the bottom edges.
8. Glue the Front to the Sides and Base, ensuring that the Front sits on top of the Base.
9. Take the Outer Door Frame and attach it to the Front, aligning to the Door.
10. To attach the Roof, overlap the longer of the two Roof pieces on top of the other piece. Then glue to the Conservatory.
11. Glue all Roof Tiles to the Roof.
12. Take the Roof Tile Toppers, and fold along the dashed line. Apply glue to the decorative half of one of the pieces and attach the other piece. Glue this to the Roof, making sure to cover the join at the centre of the Roof so that the decorative edge points upwards.

To make the alternate version use cardstock and acetate only.

1. Glue all pieces of acetate to the back of the corresponding pieces or cut cardstock as listed in the Cutting List.
2. Once dry, fold along all tabs, and apply glue to the tab to the bottom edge of the Back piece. Attach it to the back edge of the Base, making sure to line up the dashed line to the edge of the Base.
3. Repeat step 2, using the Front piece.
4. Glue the side tabs of the Back and attach to the edge of the Sides.
5. Repeat step 4, using the Front piece.
6. Glue the tabs on the Roof piece and attach to the Conservatory.

Through the Window

Cutting List:

All construction projects on this USB have been made using 1000 micron construction board. If you are using 750 micron construction board, you will need to cut 4 of each layer. We recommend using Pinflair Bookbinding Glue.

From construction board:

• Window Box Frame

- 1 x Frame Base
- 2 x Frame Front and Back
- 2 x Frame Side
- 1 x Window
- 1 x Outer Window Frame

• Scene 1

- 1 x Scene1 1
- 1 x Scene1 2
- 1 x Scene1 3
- 1 x Scene1 4
- 1 x Scene1 5
- 1 x Scene1 6

- 1 x Scene1 7
- 1 x Scene1 8
- 1 x Scene1 9
- 1 x Scene1 10
- 1 x Scene1 11
- 1 x Scene1 12
- 1 x Scene1 13
- 1 x Scene1 14
- 1 x Scene1 15

Draw Files:

- Scene1 Draw File 1
- Scene1 Draw File 2

- **Scene 2**

- 1 x Scene2 1
- 1 x Scene2 2
- 1 x Scene2 3
- 1 x Scene2 4
- 1 x Scene2 5
- 1 x Scene2 6
- 1 x Scene2 7
- 1 x Scene2 8

1. Stick all of the layers of construction board together to make all of the pieces listed in the Cutting List.
 2. Once dry, paint all of the pieces as desired. Or alternatively cover all necessary pieces using decorative papers.
- Note:** The scene designs layer up and will cover parts of the previous layers. Use the next numbered layer to check the overlap to not waste decorative papers.
3. Edge all pieces using a thick marker pen to hide the raw construction board edges.
 4. To make the Window Box Frame, glue the Frame Front to the back edge of the Frame Base, ensuring that the Front sits on top of the Base.
 5. Glue the Frame Side pieces to the Frame Front and Base, making sure that they sit on top of the Frame Base.

- **Scene 3**

- 1 x Scene3 1
- 1 x Scene3 2
- 1 x Scene3 3
- 1 x Scene3 4
- 1 x Scene3 5
- 1 x Scene3 6
- 1 x Scene3 7

6. Glue the Frame Back to the Frame Sides and Base.
7. Glue the Outer Window Frame to the top of the Window, making sure to line the Frame up with the edges of the Window. Leave the Window Frame to one side for later.
8. To create the Scenes, using Scene layer 1 as the back layer. Glue each layer in place matching to the edges of the back piece.
9. To create the framed paintings in Scene1, use the Scene1 Draw File 1 to draw on the solid piece in Scene1 13.
10. Repeat for Scene1 Draw File 2 and Scene1 14.
11. Once you have a completed scene, glue the back layer to the inside of the Box Frame.
12. Glue the Window Frame to the top of the Box Frame.

Wagon

Cutting List:

All construction projects on this USB have been made using 1000 micron construction board. If you are using 750 micron construction board, you will need to cut 4 of each layer. We recommend using Pinflair Bookbinding Glue.

From construction board:

- 1 x Wagon Base
- 1 x Wagon Front
- 1 x Wagon Back
- 2 x Wagon Side
- 1 x Wagon Top
- 2 x Wagon Roof Front & Back
- 1 x Roof
- 1 x Porch Front
- 2 x Porch Side
- 1 x Wagon Decoration
- 4 x Wheel
- 4 x Wheel Outer
- 4 x Wheel Centre
- 4 x Axle
- 1 x Door
- 1 x Outer Door Frame
- 2 x Side Window
- 2 x Outer Side Window Frame
- 3 x Window Box
- 1 x Back Window
- 1 x Outer Back Window Frame
- 1 x Step

From cardstock:

- Roof Tiles – As many as required.
- 1 x Roof Tile Topper

From acetate:

- 1 x Door Glass
- 2 x Side Window Glass
- 1 x Back Window Glass

1. Stick all of the layers of construction board together to make all of the pieces listed in the Cutting List.
2. Once dry, paint all of the pieces as desired. Or alternatively cover all pieces using decorative papers.
3. Edge all pieces using a thick marker pen to hide the raw construction board edges.
4. Glue the Wagon Back to the back edge of the Wagon Base piece, ensuring that the Back sits on top of the Wagon Base.
5. Take the Wagon Side pieces and glue them to each side of the Back, making sure that they sit on top of the Wagon Base and Back.
6. Glue the Front to the Sides and Base.
7. Glue the Glass pieces to the back of the corresponding Door and Window pieces.
8. Glue the Door to the inside of the Front piece, aligning the Door to the doorway.
9. Glue the Side Windows to the inside of the Wagon, aligning them to the Windows.
10. Glue the Back Window in place on the inside of the Back piece of the Wagon.
11. Glue together the Window Box pieces to create 3 small planters.
12. Glue in place the Outer Door Frame, aligning to the Doorway.
13. Take the Outer Side Window Frames and glue in place using the Side Windows as a guide
14. Apply glue to the back of a Window Box and attach the Window Box to the underneath of a Window, ensuring to line up using the Window Frame.
15. Repeat step 14 with the other Windows.
16. Glue the Wagon Top to the top edge of the Wagon. Taking the Wagon Roof Front and Back, glue to the front and back edge of the Wagon Top.
17. To attach the Roof, overlap the longer of the two Roof pieces on top of the other piece. Then glue to the Wagon
18. Glue all Roof Tiles to the Roof.
19. Take the Roof Tile Topper, and fold along the dashed line. Then glue this onto the Roof, covering the join at the centre of the Roof.
20. Glue the Porch sides to the Front and Base of the Wagon.
21. Glue the Porch Front to the front edge of the Wagon Base.
22. To create the Step, glue the thinner piece to the bottom edge of the larger piece to create a right angle.
23. Glue the back of the larger step piece to the front edge of the Wagon Base.
24. Glue together two Axle pieces. Repeat for the other two pieces.
25. Glue together the Wheel and Wheel Outers to create four Wheels. Finish by gluing the Wheel Centres to each Wheel.
26. Glue each Wheel to the ends of the Axle piece.
27. Glue the Axles to the underside of the Wagon.
28. To finish, glue the Wagon Decorations to the front of the Wagon at both sides of the door.

Windmill

Cutting List:

All construction projects on this USB have been made using 1000 micron construction board. If you are using 750 micron construction board, you will need to cut 4 of each layer. We recommend using Pinflair Bookbinding Glue.

From construction board:

- 1 x Lower Base
- 2 x Lower Front & Back
- 2 x Lower Side
- 1 x Lower Top
- 1 x Balcony Floor
- 2 x Balcony Front & Back
- 2 x Balcony Side
- 1 x Middle Base
- 2 x Middle Front & Back
- 2 x Middle Side

- 1 x Middle Top
- 1 x Facing Base
- 2 x Facing Front & Back
- 2 x Facing Side
- 2 x Upper Base & Top
- 1 x Upper Back
- 1 x Upper Front
- 2 x Upper Side
- 2 x Sail Dowel
(Alternatively use 8mm Dowel)

- 4 x Sail Frame
- 4 x Outer Sail Frame
- 4 x Washer
- 2 x Sail Bracers
- 1 x Sail Front

From cardstock:

- 4 x Sail

1. Stick all of the layers of construction board together to make all of the pieces listed in the Cutting List.
2. Once dry, paint all of the pieces as desired. Or alternatively cover all pieces using decorative papers.
3. Edge all pieces using a thick marker pen to hide the raw construction board edges.
4. To create the Lower section of the Windmill, glue the Lower Back to the back edge of the Lower Base, ensuring that the Back sits on top of the Base.
5. Glue the Lower Sides to the Lower Back and Base, making sure that the Sides sit on top of the Base.
6. Glue the Lower Front to the front edge of the Base, making sure it sits on the Base.
7. Attach the Lower Top to the top edges of the lower section of the Windmill.
8. Glue the Balcony Floor to the Top of the lower section, making sure that the Balcony Floor is central on the Top.
9. Glue the Balcony Front to the front edge of the Balcony Floor, then glue the Balcony Side pieces to the Floor and Front. To finish the Balcony, glue the Balcony Back to the back edge of the Balcony Floor.
10. To create the Middle section of the Windmill, glue the Middle Back to the back edge of the Middle Base, ensuring that the Back sits on top of the Base.
11. Glue the Middle Sides to the Middle Back and Base, making sure that the Sides sit on top of the Base.
12. Glue the Middle Front to the front edge of the Base, making sure it sits on the Base.
13. Attach the Middle Top to the top edges of the Middle section of the Windmill.
14. Apply glue to the bottom of the middle section of the Windmill, and attach it to the centre of the Balcony Floor.
15. Glue the Facing Base to the top of the middle section of the Windmill.
16. Glue the Facing Front to the outer front edge of the Facing Base so that the Facing Front sits on the outside of the Base, making sure that the top edge of the Facing Front is level with the Facing Base.
17. Glue the Facing Sides to the outer side edges of the Facing Base.
18. Repeat step 16 with the Facing Back.
19. Take two Washer pieces and glue together. Glue these to the inside of the Upper Back piece, using the circle cut-out of the Upper Front as a guide to where to place the Washers.
20. Glue one Washer to the inside of the Upper Front, ensuring that the Washer is lined up to the circle cut-out. Glue the remaining Washer to the outside of the Upper Front, lining up to the circle cut-out.
21. Glue together the two Sail Dowel pieces. If using 8mm Dowel, skip to step 22.

- 22.** To create the Upper section of the Windmill, glue the Upper Back to the back edge of the Upper Base, ensuring that the Back sits on top of the Base.
 - 23.** Glue the Upper Sides to the Upper Back and Base, making sure that the Sides sit on top of the Base.
 - 24.** Glue the Upper Front to the front edge of the Base, making sure it sits on the Base.
 - 25.** Thread the Sail Dowel through the cut-out on the Upper Front and slot the end of the dowel into the Washers on the back side of the Upper Back piece.
 - 26.** Attach the Upper Top to the top edges of the Upper section of the Windmill.
 - 27.** Glue the Sail pieces to the back of the Sail Frames.
 - 28.** Glue the Outer Sail Frames to the front of the Sail Frames.
 - 29.** To attach the Sails to the Windmill. Glue the Sail to one side of the Sail Dowel, ensuring that the next sail is attached to the dowel as well as the overhang created from the previous Sail.
- TOP TIP:** Use the smaller triangle from the Sail Bracers to determine where the Sails should be glued down to the Dowel. Place the short side on the Dowel and glue the Sail in place so that the Bracer will be attached later.
- 30.** Glue the small triangles from the Sail Bracers to the front of the Sails and the Sail Dowel.
 - 31.** Glue the remaining Sail Bracer pieces to the back of each sail ensuring to also attach to the Sail Dowel.
 - 32.** To Finish, glue the Sail Front pieces to the front face of the Sail Dowel.

Mantle Clock

Cutting List:

All construction projects on this USB have been made using 1000 micron construction board. If you are using 750 micron construction board, you will need to cut 4 of each layer. We recommend using Pinflair Bookbinding Glue.

From construction board:

- 2 x Lower Base & Top
- 2 x Lower Front & Back
- 2 x Lower Side
- 2 x Middle Base & Top
- 2 x Middle Front & Back
- 2 x Middle Side
- 1 x Top Base
- 2 x Top Front & Back
- 2 x Top Side 1
- 2 x Top Side 2
- 2 x Top Side 3
- 1 x Top Top
- 2 x Decorative Front & Back

- 1 x Clock Face
- 1 x Clock Face Frame
- 1 x Clock Hands
- 4 x Feet

From cardstock:

- 4 x Lace Trim Front & Back
- 4 x Lace Trim Side

Draw Files:

- Clock Face Draw File 1
- Clock Face Draw File 2

1. Stick all of the layers of construction board together to make all of the pieces listed in the Cutting List.
2. Once dry, paint all of the pieces as desired. Or alternatively cover all pieces using decorative papers.
3. Edge all pieces using a thick marker pen to hide the raw construction board edges.
4. Glue the Lower Front to the front edge of the Lower Base, ensuring that the Front sits on top of the Base.
5. Glue the Lower Side pieces to the Front and Base, making sure that they sit on top of the Base.
6. Glue the Lower Back, to the Side and Base pieces, making sure that it sits on top of the Base.
7. To finish the lower section. Glue the Lower Top to the top edges of the lower section.
8. To create the middle sections. Glue the Middle Front to the front edge of the Middle Base, ensuring that the Front sits on top of the Base.
9. Glue the Middle Side pieces to the Front and Base, making sure that they sit on top of the Base.
10. Glue the Middle Back to the Side and Base pieces, making sure that it sits on top of the Base.
11. To finish the middle section. Glue the Middle Top to the top edges of the middle section.
12. To create the top section. Glue the Top Back to the front edge of the Top Base,

making sure that the Back sits on top of the Base.

13. Use the visual guide to add each Side piece to the Back of the top section. Add each piece in order of their number and make sure that each piece lines up to the edges of the Back.
14. Glue the Top Front to the Base and Side pieces, making sure that the Front sits on top of the Base.
15. Glue to the Top to the top edges of the top section of the Mantle Clock.
16. Glue the Decorative Front to the front of the Top Section, aligning the bottom edge with the bottom of the top section.
17. Repeat step 16 with the Decorative Back.
18. Glue the Lace Trim pieces to the top and bottom edges of the middle section.
19. To create the Clock Face, use one of the Clock Face Draw Files to draw on the Clock Face piece.
20. Glue the Clock Face to the Front of the Decorative Front.
21. Glue the Lower, Middle & Top sections together.
22. Glue the feet to each corner of the lower section, making sure that they are all level.

Greenhouse

Cutting List:

All construction projects on this USB have been made using 1000 micron construction board. If you are using 750 micron construction board, you will need to cut 4 of each layer. We recommend using Pinflair Bookbinding Glue.

From construction board:

- 1 x Base
- 1 x Front
- 1 x Back
- 2 x Side
- 2 x Roof Trim
- 1 x Door
- 1 x Door Trim
- 2 x Work Bench Sides
- 1 x Work Bench Shelf
- 1 x Work Bench Top
- 3 x Work Bench Front & Planks
- 2 x Planter

- 1 x Front Glass

- 1 x Back Glass

- 2 x Side Glass

- 1 x Roof Glass

- 1 x Door Glass

From cardstock:

- 2 x Decorative Roof Top

An alternate version

is included and can be found here on the USB:

13 Greenhouse >

Greenhouse - Cardstock Project.

From cardstock:

- 1 x Back
- 1 x Base
- 1 x Front
- 2 x Side & Roof

From acetate:

- 1 x Back Glass
- 1 x Front Glass
- 1 x Side & Roof Glass

From acetate:

1. Stick all of the layers of construction board together to make all of the pieces listed in the Cutting List.
 2. Once dry, paint all of the pieces as desired. Or alternatively cover all pieces using decorative papers.
 3. Edge all pieces using a thick marker pen to hide the raw construction board edges.
 4. Glue the Glass pieces to the back of all of the corresponding pieces.
 5. Glue the Back piece in place to the back edge of the Base, making sure that it sits on top of the Base and that the glass is on the inside.
 6. Glue the Side pieces in place, gluing them to the edge of the Base and the Back piece.
 7. Glue the Door to the inside of the Front piece, making sure to line up the bottom edges.
 8. Glue the Front to the Sides and Base, ensuring that the Front sits on top of the Base.
 9. To attach the Roof, overlap the longer of the two Roof pieces on top of the other piece. Then glue to the Greenhouse.
 10. Take the Roof Tile Toppers, and fold along the dashed line. Apply glue to the decorative half of one of the pieces and attach the other piece. Glue this to the Roof, making sure to cover the join at the centre of the Roof so that the decorative edge points upwards.
 11. Glue the Roof Trim pieces to the front and back of the Greenhouse so that it covers the ends of the Roof.
 12. Glue the Door Trim, to the lower half of the Door.
 13. To create the Work Bench, glue the Work Bench Top to the Work Bench Sides, so that the Top sits on top of the middle section of the Sides.
 14. Glue the Work Bench Shelf to the lower section of the Sides.
 15. Glue the Work Bench Front to the front edge of the Work Bench to cover the join where the Work Bench Top meets the Sides.
 16. Glue the remaining Work Bench Planks evenly spaced across the top section of the Work Bench Sides.
- To make the alternate version use cardstock and acetate only.**
1. Glue all pieces of acetate to the back of the corresponding pieces or cut cardstock as listed in the Cutting List.
 2. Once dry, fold along all tabs, and apply glue to the tab at the bottom of the Back piece. Attach it to the back edge of the Base, making sure to line up the dashed line to the edge of the Base.
 3. Repeat step 2, using the Front piece.
 4. Glue the tabs on the Sides and attach to the edge of the Front & Back.
 5. Glue the Roof tabs into place.
 6. To finish, glue the decorative roof topper together.

Garden

Cutting List:

All construction projects on this USB have been made using 1000 micron construction board. If you are using 750 micron construction board, you will need to cut 4 of each layer. We recommend using Pinflair Bookbinding Glue.

From construction board:

- 1 x Back
- 1 x Base
- 2 x Side Fence
- 2 x Front Fence
- 1 x Tree
- 1 x Tree Roots
- 1 x Tree Foliage
- 1 x Bushes
- 3 x Grass

1. Stick all of the layers of construction board together to make all of the pieces listed in the Cutting List.
 2. Once dry, paint all of the pieces as desired. Or alternatively cover all pieces using decorative papers.
 3. Edge all pieces using a thick marker pen to hide the raw construction board edges.
 4. Glue the Back to the back edge of the Base piece, making sure it sits on top of the Base.
 5. Glue the Side Fences to the edges of the Base and Back, making sure they sit on top of the Base.
 6. Glue the Front Fences to the Sides and Base.
- TOP TIP:** Glue the Front Fences to the Sides and Base at an angle to create a larger Garden space.
7. Glue the Tree Roots to the trunk of the Tree, making sure to line up the bottom edge of the Roots to the bottom edge of the Tree.
 8. Glue the Tree into the Garden.
 9. Decorate the Garden Scene by gluing the Bushes and Grass onto the Base.
- TOP TIP:** To create a Tree with leaves, glue the Tree Foliage to the branches of the Tree. If you want to make a Tree in winter, Ignore the Tree Foliage pieces.

Dresser

Cutting List:

All construction projects on this USB have been made using 1000 micron construction board. If you are using 750 micron construction board, you will need to cut 4 of each layer. We recommend using Pinflair Bookbinding Glue.

From construction board:

- 2 x Base and Top
- 2 x Front and Back
- 2 x Side
- 1 x Work Top
- 1 x Upper Back
- 1 x Upper Top
- 1 x Upper Decorative Top
- 1 x Upper Front
- 1 x Upper Sides
- 1 x Upper Side Trim
- 1 x Upper Trim
- 2 x Shelf
- 1 x Dresser Fronts
- 1 x Dresser Front Trim (One layer only)
- 1 x Dresser Handles
- 4 x Dresser Foot

1. Stick all of the layers of construction board together to make all of the pieces listed in the Cutting List.
2. Once dry, paint all of the pieces as desired. Or alternatively cover all pieces using decorative papers.
3. Edge all pieces using a thick marker pen to hide the raw construction board edges.
4. Glue the Back piece to the Base piece, making sure it sits on top of the Base piece.
5. Glue the Side pieces to the Base pieces, making sure they sit on top of the Base piece.
6. Glue the Front to the Sides and Base.
7. Glue the Top to the top edges of the Dresser.
8. Glue the Work Top to the top of the Dresser.
9. To create the upper section of the Dresser, glue the Upper Sides to the Side edges of the Upper Back, making sure that they sit in front of the Back.
10. Glue the Upper Top to the top edges of the upper section.
11. Glue the Upper Front to the underside of the Upper Top and Sides.
12. Glue the Upper Decorative Top to the top of the upper section.
13. Glue two of the Upper Side Trim Pieces to the outside of the Upper Sides, making sure to line up the bottom edges.
14. Glue the remaining two pieces to the inside of the Upper Side pieces, making sure to line up the bottom edges.
15. Glue the Upper Trim on the inside of the Back at the bottom edge, lining up to the Upper Side Trim Pieces.
16. Glue the Upper Section to the Bottom part of the Dresser making sure the Back is aligned to the Back piece of the Dresser.
17. Glue the Shelf pieces evenly spaced into the upper section of the Dresser.
18. Take the Dresser Fronts and glue the Dresser Front Trim pieces to each of the Fronts.
19. Glue the Dresser handles to each Dresser Front.
20. Glue the Dresser Front to the front of the Dresser.
21. To finish, glue the two Dresser Foot pieces together, then glue each Foot to the bottom corners of the Dresser Base.

Parasol Instructions

From cardstock 180gsm:

- 1 x Parasol A

From cardstock 250gsm:

- 1 x Parasol B

1. Fold along the dashed lines on Parasol B, using mountain & valley folds as shown on the visual guide

2. Fold along the dashed lines on Parasol B, using mountain & valley folds as shown on the visual guide
3. Glue Parasol A to the underside of Parasol B
4. Carefully thread a dowel through the holes in centre of the Parasol.
5. At the top of the dowel glue one end of one of the long strips and roll up to create a stopper.
6. Using the remaining long strip, roll around the dowel underneath the Parasol, making sure that the strip is able to be moved up and down the dowel. Add a small amount of glue so that it attaches to the bottom of the Parasol but remains moveable on the dowel.

Welcome to the creative world of
Digital Craftorium!

You will find 15 scalable construction projects
and a versatile range of decorative elements
for your creations, all on one USB!
