

Monthly Craft Along Shaped Card

1. Select a rectangle or square and re-size it to measure 296mm high by 178mm wide.
2. Select the straight-line bo-001 (or create one in canvas workspace, see video tutorial on highlight crafts YouTube channel).
3. Re-size the straight line to 148mm and rotate it 90 degrees so that it is vertical. Duplicate the line so that you have 2 and move 1 of them out of the way.
4. Select the rectangle and 1 of the straight lines. Align them to the bottom and the left. Tap the screen to release the shapes.
5. Nudge the straight line up 50 spaces on a SDX machine and 60 spaces to the right. (on a CM machine nudge up 25 spaces and 30 spaces to the right)
1. Group.
6. Repeat step 5 with the second straight line but align to the bottom and the right.
7. Select all and group.
8. Select perforation line or make one in canvas (see video tutorial)
9. Re-size to 114mm wide. Select all and align centrally vertically and centrally horizontally. Group.
10. Add perforation line bo-b003 and resize to 25mm.
11. Duplicate the perforation line so that you have 2. Set on the mat.
12. Select both perforation lines and align them centrally vertically and centrally horizontally. Group.
13. Select everything and align to the bottom and the left.
14. Nudge the perforation lines 5 spaces to the right on an SDX or 3 spaces on a CM machine.
15. Nudge the grouped perforation lines up 50 spaces on an SDX or 25 spaces on a CM machine.
16. Ungroup the perforation lines and tap the screen to release the shapes. Nudge 1 of the perforation lines up 50 spaces on a SDX or 25 spaces on a CM machine.

Monthly Craft Along Shaped Card

17. Select the 2 perforation lines and group. Duplicate so you have 2 and move 1 set outside the card base. Group everything else.
18. Select all and align to the right and the bottom. Select the perforation lines and move them in 5 spaces on a SDX or 3 spaces on a CM machine. Move them up 50 spaces on a SDX and 25 on a CM machine.
19. Select everything and group.
20. Add perforation line bo-b003 and resize to 25mm. Duplicate so you have 2 and move 1 out of the way.
21. Select 1 of the perforation lines and the card shape and align centrally vertically and to the left. Move it 5 spaces to the right on an SDX and 3 spaces on a CM machine.
22. Move the selected perforation line up 50 spaces on an SDX or 25 spaces on a CM machine. Group.
2. Select all and align centrally vertically and to the right. Move the perforation line 5 spaces on an SDX or 3 spaces on a CM machine to the left. Move the perforation line up 50 spaces on an SDX or 25 spaces on a CM machine.
23. Group.

Mats and Layers

1. Select a square or rectangle. Resize to 147mm high by 118mm wide.
2. Duplicate the rectangle and resize the second one to 25mm high by 178mm wide.
3. Select all and align centrally vertically and to the bottom and weld.
4. Create inward offset lines to suit the sizes you require. You can do this on an SDX but will need to do it in canvas workspace if you own a CM machine.
