

SHELF CARD

1. Cut out the template pieces and fold along the score lines.

2. Fold the base card in half.
Please note that where it is folded the gap is shallower on the back of the card than on the front of the card.

3. Fold down the tabs on the shelf piece and slide through the slots on base card. Unfold the tabs at the back of the card to secure.

4. Make sure the end flap can open and close easily.
Decorate as required.

5. Slide the front, middle and back layers into the slots on the shelf. On the middle and back, unfold the tabs and use them to support the shelf.

6. Your 3D Shelf Card is now ready to embellish.
