

## STAR CARD

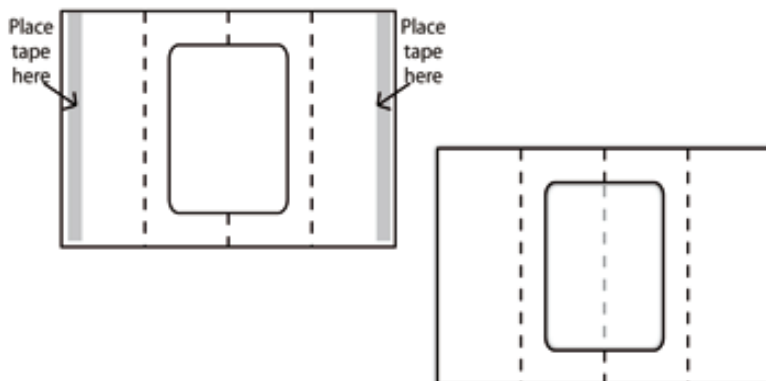

1. Cut out the templates and fold along any score lines. You will need 5 of each template piece.

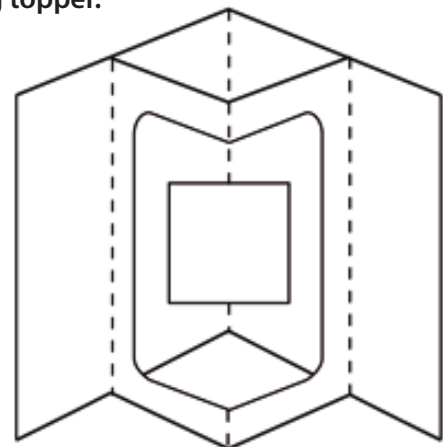

2. Fold the Aperture Section in half along the central score lines to create a mountain fold. Then fold each side back towards the centre along the vertical lines creating valley folds.

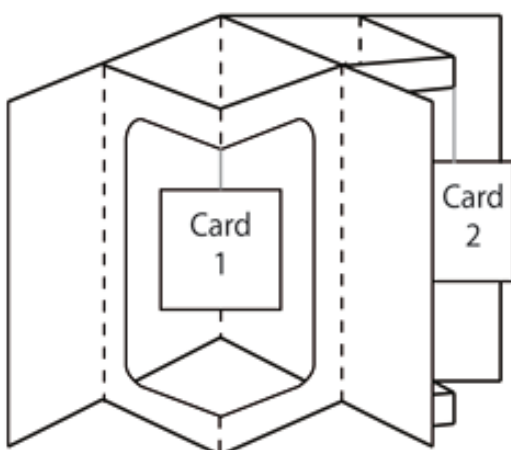

3. Open the Aperture Section out and turn it over. Place double sided tape or glue along the two side edges of the card. Stick the Aperture Section directly on top of the Back Section.

4. When stood upright the centre section will now form an aperture. Use invisible thread to attach the topper to the centre of the aperture to create a hanging topper.

5. Repeat steps 1-4 with the four remaining template pieces. Your Star card is now ready to assemble. Place double sided tape or glue down the back side of Card 1, then stick to the left hand side of Card 2.

6. Place double sided tape or glue down the back right hand side of Card 2, then stick the left hand side of Card 3. Repeat this to stick Card 4 to Card 3 and Card 5 to Card 4. Do not stick Card 5 to Card 1 so the card can still fold flat. The card is now ready to decorate.
