CONTENTS:

- 12 x 10ml Paint Colours (including 4 Luminous Colours)
- 30 x Watercolour Paper
- 2 x 10g Carrageenan Powder
- 2 x 50ml High Concentration Carrageenan Liquid
- 2 x Pipette
- 3 x Plastic Rod
- 1 x Comb
- 1 x A5 Plastic Container
- 1 x 1g Spoon
- 1 x Tweezers

1. To get crafting with no waiting time, fill one of the High Concentration Carrageenan Liquid pouches with water. Shake to mix well and pour into the rectangle container. This solution is ready to use.
2. If you are using the Carrageenan powder, fill the rectangle container with 500ml of water. sprinkle 2 full spoons of the powder evenly on the water. Mix the powder into the water until it is fully dissolved. Leave the mixed solution still for at least 5-8 hours. Stir again before use.
3. Drop the paint into the solution about 2cm away from the surface. Drop other paints colours one by one until you have the desired colour combination you require.
4. Use the plastic rod or comb to draw patterns in the colours. Do not mix too hard or you will ruin the marble effect.
5. Lay a piece of paper onto the water surface, leave it for approximately 5 seconds and then lift the paper off.
6. Keep the wet side of the paper upwards until it is air dried.

Tips:

- Shake the bottle of dyes before painting.
- Use watercolour paper as it absorbs the water better.
- Clean your plastic rod and comb after mixing to prevent colour mixing next time you use them.

Safety:

Marbling Powder may not touch the eyes, nose and throat. Do not place the mixture in the mouth or apply it the body. Avoid contact with eyes and inhalation of dust. In case of eye contact, flush with water and contact a doctor if discomfort persists. Adult assistance and supervision is required if using with children (kit is intended for children over the age of 6+).
