

WATERFALL CARD

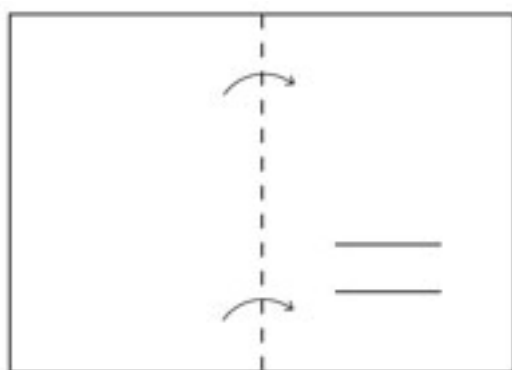

1. Cut out the templates and fold along any score lines.

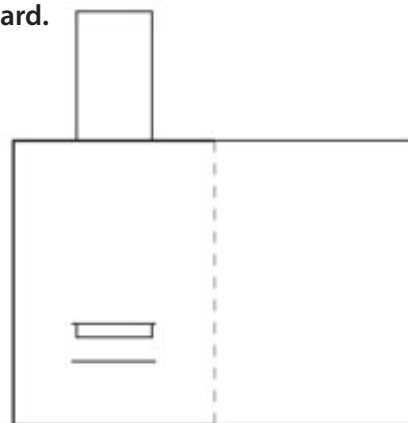

2. Use double sided tape or glue to stick the edge of Topper 1 underneath the second central score line on the Waterfall piece. Stick Topper 2 underneath the next score line and repeat this with Toppers 3, 4 and 5.

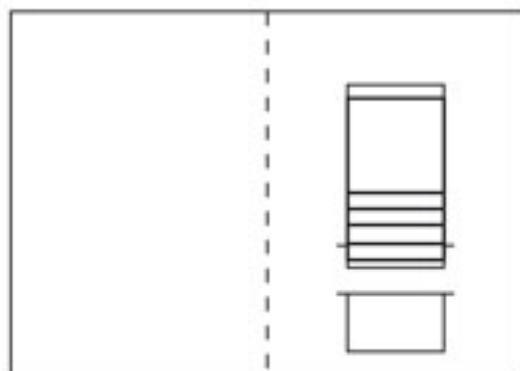

3. Fold the Card Base in half. Place double sided tape on the bottom edge of the Waterfall piece.

4. Slot the Waterfall piece through the top slit in the Card Base and stick the Waterfall section to the back of the card.

5. Fold the top of the Waterfall piece back in itself and slot this through both slits on the Card Base so that it creates a pull tab at the bottom.

6. When you pull the bottom tab up and down the Toppers will create a Waterfall effect. Your card is now ready to decorate and embellish.
